

October 2, 1970

Mr. T. R. Spidel, President  
Kendallville Iron & Metal, Inc.  
Box 69  
Kendallville, Indiana

Dear Mr. Spidel:

Re: Approval of Proposal  
Sanitary Landfill Operation  
Noble County, Section 9  
T.34N., R.11E., 1/4 Mile South of  
Kendallville

You are hereby notified that the State Health Commissioner of the State of Indiana has this 2nd day of October, 1970, approved the proposal for the operation of a sanitary landfill at the above referenced site to be owned and operated by Kendallville Iron & Metal, Inc.

This project will include the area method of sanitary landfill operation. A minimum of six feet of undisturbed soil will exist over the ground water table. When necessary for further protection of ground water, a layer of impervious soil will be deposited prior to refuse disposal. There will be no disposal of refuse in the area of the abandoned gravel pit on the southwest corner of the site. Operations will be kept back from Lane Ditch a minimum of 75 feet and greater if necessary to avoid contamination. No liquid waste will be disposed of in this landfill. Waste material will be compacted and covered daily with a minimum of six inches of soil. Final cover will consist of a minimum of two feet of soil. Fencing will be used to control blowing paper. Such paper will be picked up daily. A sanitary privy will be constructed at the site for employees' use. Fire protection will depend on a 2,500-gallon tank of water at the site, as well as the local fire department. Upon completion of the landfill operation, this land will be reclaimed for industrial purposes.

This approval is given with the following conditions:

1. That all refuse be disposed of in a manner to prevent contamination of ground water and pollution of surface waters.
2. That no burning of wastes be conducted at the sanitary landfill site.

Mr. T. R. Spidel, President  
Kendallville Iron & Metal, Inc.

October 2, 1970

3. That no liquid, hazardous chemical, smoldering or hot ash wastes be deposited at this sanitary landfill site.
4. That, if nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.
5. That all necessary local permits, including zoning, be obtained prior to any operation.
6. That the operation of the sanitary landfill be conducted in accordance with the "Standards for Selection, Operation and Maintenance of a Sanitary Landfill," adopted by the Division of Sanitary Engineering, Indiana State Board of Health. (A copy is enclosed.)
7. That no scavenging or salvaging be permitted at this site.
8. That the final cover be provided from a layer of impervious soil with a minimum slope of one percent.
9. That construction of semi-public sanitary facilities meets the approval of the State Board of Health.
10. That this approval be renewed upon any change in ownership or operating contractor.

This proposal was prepared and certified by Mr. David K. Wolf, P. E., and submitted by Emerick & Diggins, Law Offices, on September 17 and 29, 1970.

This approval shall be void if operation is not begun before November 1, 1971.

Sincerely,

A. C. OFFUTT, M. D.  
STATE HEALTH COMMISSIONER  
INDIANA STATE BOARD OF HEALTH

Enclosure

Approval No. SW 19
